PROFESSIONAL SUMMARY

I'm an MCA graduate and aspiring Software Developer with a strong interest in building practical, reliable, and user-focused applications. My technical foundation includes Java, Spring Boot, web technologies, database management, and object-oriented programming, along with hands-on experience in Android WebView application development and e-commerce review monitoring. I enjoy solving technical challenges, exploring new technologies, and turning ideas into functional software. I'm looking to begin my professional journey in a collaborative environment where I can contribute, learn, and grow as a software developer.

EDUCATIONAL BACKGROUND

MCA - Master of Computer Applications

Meenakshi Ramaswamy Engineering College - Anna University
2024 - 2026

M.Sc.CS - Master of Science in Computer Science

Meenakshi Ramasamy Arts and Science College - Bharathidasan University
2021 - 2023 | CGPA: 7.2/10 (Equivalent to 72%)

BCA - Bachelor of Computer Applications

Dr.S. Ramadoss Arts and Science College - Thiruvalluvar University
2018 - 2021 | CGPA: 6.3/10 (Equivalent to 63%)

TECHNICAL PROFICIENCIES

Programming Languages :	• Java	• C#	• C++
Frameworks :	• Spring Boot	• Angular JS	• Servlets
Web Technologies:	• JSP	• HTML5	
Databases:	• MySQL	• Mongo DB	

PROJECT

Android WebView Application for Integrating Web Content into a Native Mobile Platform:

January 2026 To June 2026 | PG Project

- Developed an Android application using WebView to seamlessly integrate web-based content within a native mobile environment.
- The application enables users to access and interact with web-based content through a mobile interface without requiring a separate web browser.

E-Commerce Fake Review Monitoring and Detection:

February 2023 To July 2023 | PG Project

- online product fake reviews—often generated by bots, paid or users competitors—undermines trust and misleads buyers.
- This solution can support customers in making informed purchasing decisions while helping e-commerce platforms maintain a more trustworthy review environment.

CERTIFICATE

- Java SE Certified Developer with hands-on, industry-oriented training from GTEC Education, skilled in building efficient and scalable Java applications.
- Completed an intensive 15-day online course focused on C# development and core syntax.
- Implemented secure CRUD operations with MySQL to manage backend data flows, ensuring data integrity and efficient query performance.
